

eTWIN SERIES

The eTwin is a compact, easy-to-use equipment consisting of two dosing pumps and two parameters controllers designed to measure pH, Redox and Chlorine plus the temperature. Mainly conceived for pool's industry, the dosing pumps are available either in peristaltic and solenoid versions.

On request the device could be equipped with complete calibration kit, including sensors and mounting accessories.

Common Features:

- Over dosing alarm
- set-point with working mode ON-OFF, proportional, hysteresis regulation, delay time for pump activation depending on the set-point value
- Power supply: 230V 50-60Hz*;
- Supplied with complete installation kit: Suction hose: PVC Cristal®; Discharge hose: Poliethylene
- level control, alarm output relay
- three relay selectable from the user, set-point (measures + temperature) or timer
- antacid plastic box, backlit graphic display, wall mounting, IP65 protection degree, complete of installation kit (injection valves, foot filters, suction/delivery tubes).
